Description of function:
The hand lever valve HH5/2 is a 5/2 way piston slide valve for manual controlling the RWA- or ventilation cylinder OPEN / CLOSE.

Operation:
1) Manual operation by using the hand lever.
   hand lever up = OPEN
   hand lever down = CLOSE

Installation:
1) Variable mounting position
2) Join connections as follows:
   P ... Compressed air
   A ... Pneumatic cylinder OPEN
   B ... Pneumatic cylinder CLOSE

Technical data:
max. operating pressure 16bar
nominal width of valve 4mm
ambient temperature range -15°C - +55°C

Pneumatic symbol:
